EDUCATION

KIT KalaingarKarunanidhi Institute of Technology - Coimbatore, India

2023 – 2027

B.Tech. Computer Science and Business Systems , Pre-Final year

Current **CGPA: 7.02/10.0**

Coursework: Computer Networks, Operating Systems, Database Management Systems

10th – **ALL PASS**

12th – **63%**

EXPERIENCE

• . Full Stack Development Intern (Java)

Offline Internship

Duration: **15 Days**

- Assisted in developing responsive web pages using **HTML, CSS, and JavaScript**.
- Gained practical exposure to full-stack development concepts and workflows.
- Worked on improving UI responsiveness and basic backend integration.

PROJECTS

AI Face and RFID Recognition System | Python, OpenCV

- Developed an intelligent facial recognition system to accurately identify individuals.
- Integrated RFID authentication with face recognition for enhanced security.
- Implemented image processing techniques using OpenCV for real-time recognition.

Automatic License Plate Recognition (ALPR) System | Python, YOLOv8, EasyOCR, OpenCV

- Developed an end-to-end **Automatic License Plate Recognition system** to detect and recognize vehicle number plates from images and video streams.
- Implemented **YOLOv8** for real-time vehicle and license plate detection with high accuracy.
- Used **EasyOCR** to extract text from detected license plates and store results for further processing.
- Integrated **OpenCV** for image preprocessing, bounding box visualization, and frame handling.

AgentForge — Multi-Agent AI Software Development System | Python, LangGraph

- Developed a multi-agent AI software development system enabling Project Manager, Architect, Developer, Reviewer, and Tester agents to collaborate on software creation tasks.
- Implemented a **LangGraph StateGraph** workflow to automate requirement analysis, system design, code generation, code review, and testing from a single natural language prompt.
- Built RESTful APIs with **FastAPI** and integrated the **Groq** API for high-speed LLM inference, ensuring efficient agent communication and execution.
- Enhanced response accuracy using Retrieval-Augmented Generation (RAG) with **ChromaDB**, allowing agents to retrieve and utilize relevant project knowledge during development.

TECHNICAL SKILLS

C	React	GitHub
Python	Sql	VSCode
JavaScript		

CERTIFICATIONS & COURSES

- AWS Academy Graduate – Cloud Foundations
- Basics of Python – Completion Certificate
- Cisco – Introduction to Cybersecurity
- Cisco – Introduction to Data Science
- Cisco Python Essentials 1
- Cisco Python Essentials 2
- Java Foundation Certification
- Cisco CCNA: Introduction to Networks
- Python Foundation Certification
- NPTEL – Cloud Computing
- Salesforce Certified Agentforce Specialist
- Salesforce Trailhead – AgentBlazer Champion Level
- Web Development using HTML & CSS – TechA

Leetcode : Max rating - **1463** | **Codeforces** : Max rating – **859** | **Codechef** : Max rating - **1326** | Problems : **150+** |

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
